

# ECO ALLIES INC.

## Eco Allies-BioChar Now-Climate Cure Capital J/V Summary

October 14 2020

### Climate Cure Capital Corporation

The Climate Cure Capital™ team combined, possesses over 40 years of experience in project design, management, and implementation in the greenhouse gas reduction and renewable energy arenas. Its strategy identifies specific opportunities to provide emission reductions and/or energy efficiency in a startup project's early stages. For established operations, Climate Cure provides innovative solutions and technologies by directing a project to achieve planned results. It receives a base fee and a considerable share of the environmental offset credits generated. It provides environmental commodities services that can finance pollution mitigation from the production, sale, and brokerage of carbon credits, emissions credits and other environmental credits. <http://climatecurecapital.com>

Climate Cure's 230,000 tons of Verified Carbon Standard carbon offset credits have been assigned to J/V partner company, Eco Allies, Inc. These serial numbered credits are used in project financing and neutralization programs, and for direct sale. Carbon footprint offsetting entities offer credits for sale to people and businesses. For example, Eco Allies is currently selling 230,000 tons of carbon offset credits at their e-commerce site for \$12.95 per ton. [http://www.ecoallies.biz/buy\\_carbon\\_offset\\_credits\\_online.html](http://www.ecoallies.biz/buy_carbon_offset_credits_online.html)

Climate Cure developed the proprietary fast growth non-invasive Paulownia tree called the HDF SuperGreenTree™. They were developed by non-genetic modification through grafting. Climate Cure's 5,000,000 HDF SuperGreenTree™ seeds have been assigned to Eco Allies to broaden the cultivation footprint of our SuperGreenTrees™. For years, HDF SuperGreenTrees™ have been successfully grown and harvested domestically.

Leading Industry expert Philip Scalzo (<https://www.linkedin.com/in/philip-scalzo-731a5830/>) analyzed HDF SuperGreenTrees™ for revenue potential and calculated that over three years each tree could yield \$44.00 just from biomass. Their carbon offset credit value increases that considerably. One revenue stream from the trees is biofuel pellets.

Six weeks after planting, these trees grow to 1 1/2 feet and continue growing 20 feet a year, to a maximum 60-foot height. But they can be harvested after one year for biomass for clean energy, making biochar, and even to make a product that supplants coal. They are a phytoremediator, meaning they remove toxins from soil. Their ingestion of CO<sub>2</sub> produces offset credits. These trees will fully re-grow from their stumps up to 6 more times after the original planting and the subsequent harvesting of them.

Mixing mulched HDF SuperGreenTrees™ with effluent from animal farms produces a cleaner burning, efficient fuel to sell. If not utilized, methane, a dangerous (and smelly) greenhouse gas result. Preventing or lowering methane emissions benefits the atmosphere and results in high value, marketable methane offset credits.

HDF SuperGreenTrees™ produce a very high-quality biochar. Biochar is a type of charcoal that is used in agriculture as a soil amendment. Biochar, is rich in carbon, and can endure for thousands of years, enhances soil for better production yields over extended periods.

### **Eco Allies, Inc.**

Eco Allies™ (EA) <http://ecoallies.biz> is a newly formed Nevada corporation with \$3.56 mil in assets and a zero debt zero liability balance sheet. EA is pursuing opportunities in the Renewable and Sustainable Technologies Sectors and Climate Change Mitigation. EA entered a J/V agreement with Climate Cure Capital (CC) <http://climatrccurecapital.com> and Biochar Now Inc. (BN) [www.biocharnow.com](http://www.biocharnow.com) to establish operations at EA's HQ facility. The Joint Venture encompasses initial activities to manufacture, distribute, and market the Eco Allies™ branded Biochar Now USDA approved biochar products to regional, national, and global markets for agriculture, livestock feed, industrial plastics, soil amendment and fertilizer, government pollution remediation projects, renewable energy, and other renewable and sustainable climate change mitigation and ecofriendly industries. CC plans to build and manage a global offset credits trading exchange and datacenter and trade offset credits generated by EA and others while continuing its landfill methane mitigation operations. EA will to apply for a publicly traded listing through a SEC Reg A+ IPO registration.

EA is currently securing capital to fund the launching of the EA-BN-CC Joint Venture. The Joint Venture proposed capital and other contributions will be as follows: EA agrees to leverage its 230k tons of carbon offset credits and 5mil SuperGreenTrees™ seeds for \$1mil to finance EA's acquisition of a \$500,000 facility to manufacture Eco Allies branded products. Eco Allies™ will begin planting SuperGreenTrees™ onsite at EA's HQ and then more broadly in other states beginning with Florida. EA receives one ton of carbon offset credits with each SuperGreenTree™ planted. Hemp and other farmers prefer biochar's ecofriendly fertilizer. Biochar has many uses such as removing algae infestations. Biochar made from EA's SuperGreenTree™ has been assayed and shown to create a premier quality biochar. BN contributes manufacturing, licensing and distribution agreements. EA will include only BN biochar in all its products including livestock feed, kitty litter, construction products, fertilizer, etc.

For the further growth and expansion of EA's operations, from the \$1mil seed round EA will fund the filing of an SEC Reg A+ registration for a \$19 mil IPO. Upon an Effective Reg A+ SEC registration statement, EA will apply to begin trading on the OTCQB market while preparing to qualify for a major exchange listing.

# **Eco Allies**

## **Management Team**

**Eco Allies™ is pursuing opportunities in the Climate Change Mitigation Sector and the Renewable and Sustainable Technologies Industries**

**Charles Guillory – Baton Rouge, Louisiana**

Eco Allies CEO/Director

Charles has a proven record of management and growth. He began his work life with a “Class 1” railroad and worked his way up from hand trucking freight in a warehouse to Assistant Superintendent of a Division. During most of his career, his specialty was locating to and supervising problem areas which resulted in their becoming safe, well-organized, and efficiently operated territories. He left for a more challenging position as General Manager of Operations with a service company overseeing the operation of seven sites in three midwestern states. With his personal hands-on approach, he developed five additional sites in three other states from the initial planning stages to the final smooth operation effectively doubling the revenue stream in just under two years. He then moved on to pursue the rewards of private ownership by purchasing a company with what he recognized as untapped potential and saw double-digit profit increases within the first year after implementing his own management ideas and techniques and maintained a healthy growth by adjusting to various challenges for the following eighteen years before choosing to dissolve the business this year in order to try something new.

**James Gaspard - Loveland, Colorado**

Eco Allies Director

James Gaspard's career in start-ups, mid-size and [Fortune 1000](#) companies gives him a unique perspective on all aspects on a company's life-cycle from birth, through growth and harvest. His career has been highlighted to date by his sales talent and his ability to close larger dollar volumes of transactions in several diverse industries. James is CEO of [Biochar Now](#) LLC a market leading producer of high-quality biochar. James received his Bachelor's degree from [Texas A&M](#) in 1991 and his JD/MBA from [University of Texas](#) in 1996. He

holds a variety of patents and licenses related to manufacture of biochar which is a core product of the Eco Allies business model.

### **John Toth – Reno, Nevada**

Eco Allies Director/Chief Science Officer

Mr. Toth directs our projects implementing established applied methodologies for Wind, Solar, and Biomass Energy, and verifiable Carbon Offset Projects. Since 2005, after extraordinary careers with Healthcare and Information Technologies, he has been involved with numerous projects and feasibility studies for carbon sequestration and emission reductions involving manure digesters, biomass energy, Jenbacher and Waukesha gas engines, micro turbines, solar and wind energy, green building and biochar. John has worked with Climate Cure Team and several client companies in developing International Project Idea Notes for the European Union Trading Scheme (EU ETS) and project documents for renewable energy and carbon sequestration projects in the USA adhering to the protocols of the Climate Action Reserve (CAR) and the Voluntary Carbon Standard (VCS). John holds MBA in Entrepreneurship from Pepperdine University, and Master of Science in Chemistry from U. of Hawai'i along with accreditation by the U.S. Green Building Council with the USGBC Leadership in Energy and Environmental Design (LEED)® building rating system.

### **R. Glenn Kirk, CPA - Dallas, Texas**

Eco Allies CFO/Director

Glenn is a [Dallas](#), Texas based CPA His over 30-year practice includes tax planning, preparation, and accounting services. Glenn Received a Bachelor of Business Administration degree from [Texas A&M University](#) - Commerce (formerly East Texas State University) in 1974. Certified Public Accountant and partner with the firm of McKinnon, Wootton & Associates, LLC, (formerly McKinnon & Associates, Inc.) a public accounting firm; August, 1974 to June, 2008. Sole Member of R. Glenn Kirk, CPA, LLC public accounting practice: July, 2008 to present. Member of the [Dallas Chapter of the Texas Society of Certified Public Accountants](#). Former and present clients include individuals and companies involved in the following fields: Attorneys, equipment distribution and sales, engineering , estates and trusts, manufacturing, Manufacturing representatives , natural gas distribution and marketing, oil and gas exploration, development and production, oil and gas field services, real estate brokers, developers and retail organizations.

## **W.F. 'Billy' Barnwell – Reno, Nevada**

Eco Allies Director

W.F. (William) Barnwell is the President, CEO, and Chairman of the Board of Climate Cure Capital Corporation. <http://climatecurecapital.com>. William has more than 18 years of experience in the renewable energy field and was the managing member of The Centre for Carbon Trading. He served on the Board at Global Alternative Green Energy where he helped to brand proprietary technologies known as the BCR™, the BCT™, and the BCS™, and had them certified as “Green” in the renewable energy credits (“REC”) market. Prior to that, he was the COO of Pacific Renewables in San Diego where he developed the REC trading platform. In conjunction with Electric City, he helped deliver Virtual Megawatt Power Plants. He has unrivaled experience and knowledge in the world of environmental commodities. He has marketed energy-efficient products traded on the Chicago Commodity Exchange and brought institutional funding from Morgan Stanley, Duke Power, and El Paso Energy to various projects and activities, and run a renewable energy credit desk and directed marketing efforts for the Center for Carbon Trading and Resource Marketing. The International Emission Trade Association invited him to participate in the Congressional Advisory Committee for Cap and Trade. Mr. Barnwell was selected from its 5,000 members to be one of the 50 on the advisory panel. He holds a business degree from the University of Denver.

## **Steven 'Herky' Williams – Nashville, Tennessee**

Eco Allies Director/Executive Vice President Investor Relations

Steven 'Herky' Williams has an extensive knowledge and background of the entertainment industry. As Senior Director of A&R for [Capital Records](#) he signed [Willie Nelson](#), [Garth Brooks](#), [Tanya Tucker](#) and many others. These days Herky holds a [Tennessee](#) hemp farming permit and devotes much of his time to growing Tennessee's industrial hemp industry and as a director for [Eco Allies](#). Herky is the organizer and manager behind many of [Nashville's](#) most enduring charity events.

## **Jack Honour - St Petersburg, Florida**

Eco Allies Founder/Director/ Managing Partner

C level public company executive with 20 years' experience.
